### Some tips to improve the score

- ⚠ Two of your models have more than 7.5% of outliers (5% is expected for a normal distribution with the t-value of 2 that ROBERT uses), using a more homogeneous distribution of results might help.
- ⚠ Replacing or deleting the least useful descriptors used might help to improve the model. Feature importances are gathered in the SHAP and PFI sections of the /PREDICT/PREDICT\_data.dat file.

### How to predict new values with these models?

1. Create a CSV database with the new points, including the necessary descriptors.
2. Place the CSV file in the parent folder (i.e., where the module folders were created)
3. Run the PREDICT module as 'python -m robert --predict --csv\_test FILENAME.csv'.
4. The predictions will be shown at the end of the resulting PDF report and will be stored in the last column of two CSV files called MODEL\_SIZE\_test(\_No)\_PFI.csv, which are in the PREDICT folder.

## REPRODUCIBILITY

*This section provides all the instructions to reproduce the results presented.*

### **1. Download these files (*the authors should have uploaded the files as supporting information!*):**

- CSV database (smooth\_sin\_rGO\_sin\_DMF\_clima\_noise\_ratio\_m16.csv)

### **2. Install and adjust the versions of the following Python modules:**

- Install ROBERT and its dependencies: `conda install -c conda-forge robert`
- Adjust ROBERT version: `pip install robert==1.0.6`
- scikit-learn-intelex: not installed

*(if scikit-learn-intelex is installed, slightly different results might be obtained)*

### **3. Run ROBERT using this command line in the folder with the CSV database:**

```
python -m robert --model "[GB]" --train "[70]" --ignore "[indice,area,cell]" --names "indice" --y "PCE" --auto_test
"False" --csv_name "smooth_sin_rGO_sin_DMF_clima_noise_ratio_m16.csv"
```

### **4. Execution time, Python version and OS:**

Originally run in Python 3.10.12 using Darwin Darwin Kernel Version 22.5.0: Thu Jun 8 22:22:19 PDT 2023; root:xnu-8796.121.3~7/RELEASE\_ARM\_T8020

Total execution time: 7.7 seconds (*the number of processors should be specified by the user*)
